

# Engineering Class Chain and Sprockets

Heavy-duty power transmission applications require tough, long-lasting chains and sprockets. Renold Jeffrey has the experience and the expertise to provide cost-effective solutions for your application.

- Conveying
- Elevating
- Driving

Each Renold Jeffrey Engineering Class Chain is the result of years of research and development. We start with the highest quality steels — carbon, alloy, stainless — then carefully craft reliable chains and sprockets. Components can be case hardened or heat treated, as required. Surface treatments and plating can be added to increase corrosion resistance and extend wear life.

No wonder Renold Jeffrey Engineering Class Chain is the chain of choice for today's toughest applications.
