JEFFREY**

Advancing Chain Technology

www.renoldjeffrey.com

Renold Jeffrey can supply all your requirements for oil & gas extraction.

Renold pre-packaged coiled tubing injector chain kits - Reduce costs, eliminate waste, save time.

- All chain components ready for use
- Chain manufactured to API specifications
- Designed for the forces and stresses of coil tubing injectors, reducing the risks of damage to CT string
- Through-hardened pins for longer working life
- Shepherd's Crook or split cotters available
- Solid bushings minimize bedding-in time for maximum wear life
- GP wide waist plate for superior strength and longer life
- Superior fatigue resistance
- Turn our experience (well over 100 years) into your advantage: enhance performance, reduce downtime, extend operating life
- Contact Renold Jeffrey for references and success stories in the oil & gas industry

Split leg cotter option available

Renold coiled tubing injector chain kits commonly used for retrofits and new drives

Count on Renold injector chain for uptime and reliable performance in the field.

View from the drill hole illustrates the importance of premium chain for premium performance
